

RIDWAN MAULANA KHOLIQ

STUDENT

Pasauran, Cinangka District, Banten | ridwanmaulanakholiq21@gmail.com | Phone +62 838-7635-0320

An Electronics Engineering student passionate about IoT, robotics, and web development. Experienced in working on ESP32-based projects, real-time monitoring via Telegram/Web, and developing user interfaces using HTML, CSS, and JavaScript. Ready to work in a team, adaptive to technology, and result-oriented.

TECHNICAL SKILLS

- Microsoft Office
- Arduino IDE, C/C++
- Conventional Lathe Operation
- HTML, CSS, JavaScript
- Circuit Design
- Vernier Caliper, Micrometer

EXPERIENCE

Internship – PT Krakatau Tirta Industri Cilegon, Banten

Des 2022 - Jan 2023

- Assisted in the distribution of clean water to surrounding areas of Cilegon through a controlled piping and valve system.
- Carried out mechanical tasks such as cutting and welding PVC pipes using tools like hacksaws, pipe cutters, and specialized heating equipment for pipe joining.
- Ensured all pipe joints were tightly sealed, durable, and leak-free to maintain smooth and efficient water flow within the distribution system.

EDUCATION

D3 in Electronics Engineering

Sep 2023 - Present

Politeknik PGRI Banten

- Understand the basics of microcontrollers and PLCs through lecture studies in the field of Electronic Engineering.

Mechanical Engineering

May 2020 - May 2023

SMKN 1 Cinangka

- Have experience in reading and making technical drawings, as well as mastery of workshop work practices such as operating conventional lathes, CNC machines, and milling machines during the study period at SMK.

LANGUAGES

- **Indonesian:** Fluent (Spoken and Written).
- **English:** Passive (Able to read and understand basic written and spoken communication).
- **Japanese:** Passive (basic understanding, mainly vocabulary and simple technical terms).
